• The finances of families like yours.....	21%	31	19	11	18	52%	30

Below are statements from supporters and opponents of investing more to move to clean energy, clean up our air, and reduce the pollution that causes climate change. Please read these statements and answer the following questions.

Supporters say:

Our dependence on dirty and outdated energy sources like coal and oil is the main reason that Arizona has some of the most polluted air in the United States. It also drives climate change, which 99% of scientists, NASA, and the Department of Defense all agree is a threat to our kids' future.

Moving to clean energy will not only dramatically reduce the carbon pollution that is disrupting our climate but will also reduce the sulfur, arsenic, and other pollutants that cause asthma attacks, heart and lung disease, and even cancer - and that especially affect children and seniors.

Meanwhile, the cost of wind and solar is already lower than coal and gas - and still dropping. Economists say that moving to clean energy will create thousands of good-paying jobs for all kinds of people - from engineers to factory workers to installers - while saving Arizona families thousands of dollars a year.

And now is the best time for Arizona to accelerate its plans to invest in clean energy to better position ourselves to take advantage of the new federal law and resources. If we act now, Arizona can be a leader in clean energy and capture more of the new clean energy jobs and businesses that are coming. If we don't, other states will take advantage and we'll be left behind.

Opponents say:

The new federal law is already providing Arizona with hundreds of millions of dollars to invest in green energy. Rather than diverting Arizona taxpayers' money on even more Green New Deal-style big spending schemes, the state should use its limited resources to fund other important priorities like our roads and schools.

Besides, going too fast on green energy - and moving completely away from inexpensive and reliable energy sources like natural gas - would cause electricity bills and gas prices to skyrocket at a time when Arizona families and businesses can least afford it.

Moving off tried-and-tested energy sources would also drive prices up for businesses across Arizona, killing thousands of jobs and undermining our economic recovery. Companies will be forced to send good-paying jobs to other states or countries overseas where costs are lower.

Instead of using Arizona taxpayers' money to boost one industry, we should leave green energy to the free market; if consumers want it, producers will provide it. In the meantime, it makes no sense to pass laws pushing unproven technologies that will put reliable and affordable energy at risk.

v2. Sometimes people change their minds in surveys like this and sometimes they don't. Now that you've read these statements, and thinking again about Congress' recent passage of a new law that will invest \$369 billion in efforts to expand the use of clean energy and combat climate change...Do you agree or disagree with the following statement?

This action by the federal government is a good start, but Arizona still needs to invest more to move to clean energy, clean up our air, and reduce the pollution that causes climate change.

Strongly agree	31%
Somewhat agree	32
Somewhat disagree.....	12
Strongly disagree.....	18
Don't know enough to say	8
AGREE (NET)	63%
DISAGREE (NET)	29

B6. And now that you've read these statements, once again, if Arizona invested more to move to clean energy, clean up our air, and reduce the pollution that causes climate change, do you think it would have a positive impact, negative impact, or no impact on each of the following?

	POSITIVE		NEGATIVE		No impact	NET	
	Very	Some	Some	Very		POSITIVE	NEGATIVE
